

# SOFT PEELING

## Deep cleansing enzyme exfoliant

**Gently removes dead cells from the skin, not only on the surface but works deep into skin's layers. This delicate exfoliation treatment refreshes and smooths the skin allowing it to better absorb any products used afterwards.**

This skin ointment is a weekly enzyme exfoliation treatment ensuring a noticeably clearer complexion. This natural exfoliation treatment encourages cell regeneration, cleansing your pores and clearing your skin more with each use. This gives you a visibly refreshed complexion.

As opposed to mechanical or chemical exfoliating techniques, the enzyme exfoliant (natural cosmetics) may also be used on sensitive skin or by acne sufferers.

Thanks to the ingredients of sea buckthorn, organic aloe vera, papain and plankton extract, the skin is not only exfoliated but also provided with moisture and valuable nutrients.

### Active ingredients

**Papain:** The papaya fruit contains large concentrations of the enzyme, papain. This softens stubborn calluses and smooths the skin.

**Sea buckthorn berries:** The juice of sea buckthorn berries is rich in vitamin C and antioxidants which protect the body from free radicals.

**Organic aloe vera:** is moisturising and soothes weathered, irritated skin.

**Betaine:** is extracted from sugar beet molasses. It provides moisture and soothes the skin.

### Plankton extract

A special feature of the RyBeauty Cosmetics Range is the plankton extract which is taken from **marine plankton**. The following effects have been proven in studies: It improves the skin's physical barrier, its chemical barrier and supports rapid regeneration of the skin's hydrolipid layer.

**Ingredients from the sea - for healthy skin!**

The **five pillars** of RyBeauty Cosmetics:

1. **Care and repair:** Aloe vera and sea buckthorn berries ensure a gentle treatment and provide the body with the substances it requires for its own regeneration processes.
2. **Protection:** Gentle exfoliation ensures that the protective layer of the skin remains intact while being strengthened by the plankton extract in the product.
3. **Anti-ageing:** The moisturising ingredients and the exfoliating effect help to produce smoother skin.
4. **Natural cosmetics:** With the "Natruel" seal, we confirm that our products meet 100 % of the requirements for natural cosmetics.
5. **Hypoallergenic:** Only well-tolerated substances are used in the products. The products have been dermatologically tested.

# SOFT PEELING

## Deep cleansing enzyme exfoliant

As with **all RyBeauty Products** our Soft Exfoliant is

- free from petrochemicals and mineral oils
- free from paraffin
- free from silicon oils
- free from petrochemical substances
